the destroyer the sullivans pdf

the destroyer the sullivans anatomy of the ship In naval terminology, a destroyer is a fast, maneuverable long-endurance warship intended to escort larger vessels in a fleet, convoy or battle group and defend them against smaller powerful short-range attackers. They were originally developed in the late 19th century by Fernando Villaamil for the Spanish Navy as a defense against torpedo boats, and by the time of the Russo-Japanese War in ...

Destroyer - Wikipedia

the destroyer the sullivans anatomy of the ship USS The Sullivans (DD-537) is a Fletcher-class destroyer. She is a United States Navy ship named in honor of the five Sullivan brothers (George, Francis, Joseph, Madison, and Albert) aged 20 to 27 who lost their lives when their ship, USS Juneau, was sunk by a Japanese submarine during the Naval Battle of Guadalcanal on 13 November 1942. This was the greatest military loss by any one American ...
